

Guest access to the wireless network

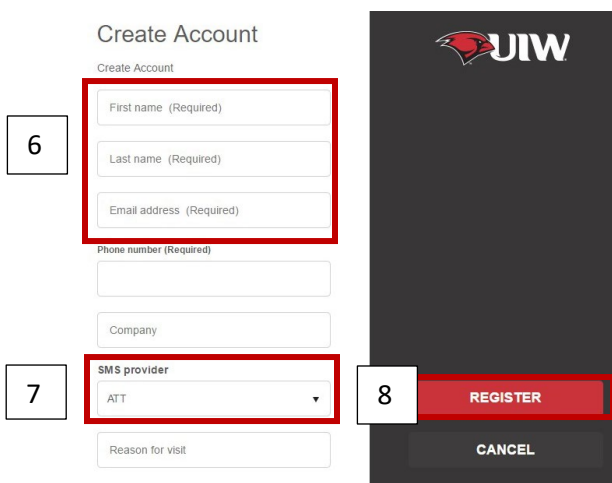

The Guest network allows individuals that do not have UIW credentials to self-register for internet access for a limited period of time (24 hours). This network is not for UIW employees or students.

1. Locate and click the **Wi-Fi- icon** on your desktop
2. Select the **uiw-guests**, wireless network and you will be redirected.

3. If you already have an account, type your **UIW-issued username** and **password**
4. Click **Login**
5. If not, click **Don't have an account?** to register for one.

6. To register an account, fill out the **Create Account** form
7. Select your **SMS Provider** (phone company)
8. Click **Register** – Within a minute or two, you will receive both a text *and* email message containing your password

Success

You are now connected to this network. Your account will be active for 24 hours. Should you need longer you can re-register using the same process.

Please wait while we register this device. You will be automatically redirected to <http://www.uiw.edu> in 10 sec. If you're not automatically redirected, or if you're taken back to the login screen, please disconnect and reconnect your device to uiw-guests to allow it to be authorized.

9. You will receive an email from 'donotreply@uiwtx.edu' with your credentials.
10. Login with your credentials and accept the terms and conditions to continue.
 - Once completed, your device will be registered.
 - You will be automatically connected to the network and see the screen below.
 - Accounts are valid for 24 hours after which time you must re-register.

If for any reason you are still unable to connect to the internet, please disconnect and reconnect your device.
