

This is an example of a plain text infographic alternative!

None of the text on this image is accessible to users employing screen readers or other assistive technology to view our website. There are three potential ways to fix this.

One

Submit it to a service like robobrain.org and allow them to convert it to an accessible PDF then add the PDF to the site's documents folder and link it to the infographic.

Two

Create a plain PDF text document with the information contained in the infographic like the one linked below.

Three

Ditch the infographic all together and put the information directly into the page as it is below.
